The Golf Estate.
More stylish, more dynamic, more refined than ever before.

Model shown: Golf Estate Sportline 2.0 TDI 140 PS with optional panoramic sunroof and metallic paint.
Breathtakingly, stunningly, unmistakably Golf.
Safer, quieter, more intelligent than ever before.

Model shown is Golf Estate SE with optional 17" Porto alloy wheels, heat insulating rear tinted glass and metallic paint.
Work or play, more than up to the challenge.
Exterior

Stylish and refined, the Golf Estate exudes an elegance that is designed to stand the test of time. Sleek halogen headlights flow seamlessly into the high gloss black radiator grille, while the body-coloured bumper adds a sporty look. Dynamic and charismatic, the front design is unmistakably Golf.

The chrome side window surrounds form an elegant frame for the windows, giving greater definition to the roof and door lines. Standard on all SE and Sportline models.

The electrically heated and adjustable body-coloured door mirrors with integrated indicators not only complement the body styling, but are also highly visible to other road users.

Black roof rails are extremely practical and can be fitted with various carrier systems for transporting bulky items.

Chrome trimmed front fog lights add a striking look to the front of all Sportline models and include a static cornering function that illuminates the road when indicating or turning at low speed, as well as providing additional safety where there is poor visibility.

The chrome trimmed radiator grille louvre inserts are contemporary and stylish, contrasting with the high gloss black finish, and giving the front design its distinctive Golf look. Standard on all SE and Sportline models.

The twin exhaust tailpipe is a distinctive design feature, hinting at the power beneath the bonnet and the sporty performance to come.

The 1.4 litre TSI 122 PS and 2.0 litre TDI 140 PS engines only.
The Golf Estate S and S BlueMotion Technology

Exceptionally well-equipped, the Golf Estate S and S BlueMotion Technology provide an impressive level of style and comfort. The entry level model offers an impressive level of specification, including body-coloured bumpers and door handles and 60:40 split folding rear seats, which fold flat into the boot floor, providing additional storage space and enabling you to carry more bulky items. The driver’s seat is height adjustable, meaning you can always find the optimum driving position, while electric windows front and rear, electrically heated and adjustable door mirrors, all enhance your driving comfort. The impressive RCD 310 DAB radio/MP3 compatible CD player ensures exceptional acoustics and features an AUX-in socket enabling you to plug your iPod or MP3 player through the car’s eight speakers. A multifunction computer on S BlueMotion Technology models includes a visual gear change recommendation for improved fuel consumption. There’s even an extra storage compartment in the roof console to keep those essentials close at hand. The Golf Estate is also fitted with a comprehensive safety package, including ABS (Anti-lock Braking System), electronic stability control, front and rear parking sensors, multi-airbag system, Isofix (Torsion Control) and child seat preparation (for two rear child seats). Additionally there are driver’s and front passenger’s whiplash-optimised head restraints, helping to reduce whiplash in the event of a collision. For more information on BlueMotion Technologies, please see pages 18-19.

The RCD 310 DAB radio/MP3 compatible CD player features eight speakers, a DAB digital radio receiver for crystal clear digital audio broadcasts and an AUX-in socket for connection to an external multimedia source (e.g. iPod or MP3 player).

Specify the Golf Estate S with ‘BlueMotion Technology’ and you’ll benefit from improved fuel consumption along with impressive CO₂ emission figures of just 109 g/km. For more information on BlueMotion Technologies, please see pages 18-19.

A Start/Stop function* automatically stops the engine when the vehicle is stationary, in neutral with the clutch released then cleverly restarts it when you depress the clutch to select first gear, saving fuel and reducing emissions.

*BlueMotion Technology models only.

Interior shown is Golf Estate S.
Maximum comfort and functionality, that’s what you can expect from the Golf Estate SE. The front seats feature height and lumbar adjustment to ensure the best position for your spine, while such items as cruise control, a dark sensor and automatic lighting function all enhance the driving experience. A front centre armrest with two cup holders, and driver’s and front passenger’s under seat drawers provide useful extra storage space, and other features include load-through provision, an alarm with interior protection and front windshield illumination. There’s even a rain sensor with an automatic dimming interior rear-view mirror. The RCD 310 DAB radio/MP3 compatible CD player ensures exceptional acoustics and features an AUX-in socket enabling you to play your iPod or MP3 player through the car’s eight speakers. Bluetooth telephone connection for HFP (Hands Free Profile) enabled telephones allows you to make and receive phone calls via the RCD 310 DAB radio system and provides safe, hands-free communications while driving. Elegant ‘Merlin’ upholstery with ‘Pyramid Black’ decorative inserts in the dash and centre console and a full set of high quality carpet mats complete the picture.

For those most mindful of the environment, the Golf Estate SE is also available with BlueMotion Technology, enabling you to enjoy all the comfort and convenience of the SE model, along with reduced CO₂ emissions and exceptional economy. For more information on BlueMotion Technologies, please see pages 18-19.

When the rear centre armrest is folded down, it provides a useful load-through facility, enabling you to transport tall, awkward and other long objects easily and conveniently.

The multifunction computer shows such information as average speed, fuel consumption and driving time. BlueMotion Technology manual models also feature a visual gear change recommendation which helps in achieving improved fuel consumption.

Stylish 16 inch ‘Atlanta’ alloy wheels with 205/55 R16 tyres and anti-theft wheel bolts provide a distinctive look to the exterior. SE BlueMotion Technology is fitted with 205/55 R16 low rolling resistance tyres as standard.

At speeds of over 19 mph, cruise control keeps your selected speed constant, enabling you to relax on longer journeys, without having to keep an eye on your speedometer.

Phones must be Bluetooth HFP (Hands Free Profile) compatible, please contact your authorised Volkswagen retailer for specific phone compatibility.
The Golf Estate Sportline and Sportline BlueMotion Technology

Sporty and dynamic, the Golf Estate Sportline offers an extremely high level of specification, ensuring the ultimate in driving satisfaction and enjoyment. Eye-catching 17 inch ‘Porto’ alloys, a chrome trimmed front air intake surround and heat insulating rear tinted glass 65% light absorbing from the B pillar backwards, all as you’d expect with such a sport performer, have also lowered sports suspension on Sportline models. Add chrome trimmed front fog lights with static cornering function for additional illumination and safety, and it’s obvious why the Sportline cannot fail to impress. Moreover, the Sportline BlueMotion Technology is fitted with 16 inch ‘Atlanta’ alloy wheels with low rolling resistance tyres and enables you to enjoy the style and luxury of the Sportline model, while benefiting from exceptional levels of economy and reduced CO₂ emissions. For more information on BlueMotion Technologies, please see pages 18-19.

Radio systems, multifunction computer and telephone connections for Bluetooth HFP (Hands Free Profile) enabled telephones can be operated easily and comfortably via the leather trimmed multifunction steering wheel.

Front fog lights with static cornering function provide better illumination of the road ahead and when cornering, not only improving vision significantly, but also helping other road users to see you. The chrome trimmed front air intake surround beneath the sporty body-coloured bumper completes the Sportline’s distinctive look.

Sporty 17 inch ‘Porto’ alloy wheels with 225/45 R17 tyres and anti-theft wheel bolts add a great look to your Sportline, while lowered sports suspension ensures safe and spectacular handling.

Interior shown is Golf Estate Sportline.
BlueMotion Technologies is our contribution to sustainable motoring. This means we offer optimum solutions for every demand, which makes driving more fuel efficient. Lower fuel consumption and lower emission diesel engines allied with BlueMotion Technologies are better for the environment and your wallet, without having to give up everyday practicality and comfort.

The BlueMotion Technology models build over the already well equipped S, SE and Sportline with low rolling resistance tyres, supplemented by innovative technology to help keep fuel consumption and emissions impressively low. The Start/Stop function momentarily switches off the engine when the vehicle is stationary, in neutral and the clutch disengaged. This is notified to the driver on the multifunction computer, then disappears when driving is resumed. The multifunction computer includes a visual gear change recommendation for improved fuel consumption, while recuperation, a regenerative braking system helps utilise energy during braking and deceleration, boosting the alternator voltage which in turn, recharges the battery.

Externally, Volkswagen’s ‘BlueMotion Technology’ badging identifies the cleanest, most energy-efficient cars in our range. So when you see these logos you’ll know we’re talking about ways to cut emissions and the cost of your motoring. Environmental technologies of today are meeting the driving challenges of tomorrow with one very important aim: to reduce the impact of our cars on the environment for future generations.

* Please see pages 38-39 for CO₂ emissions and fuel consumption figures.

To help reduce the impact on our environment, not only have we come up with a solution, we’ve designed many.

Elegant 16 inch ‘Milano’ alloy wheels with 205/55 R16 low rolling resistance tyres and anti-theft wheel bolts help to reduce fuel consumption. Standard on SE BlueMotion Technology and Sportline BlueMotion Technology models.

The multifunction computer provides useful statistics about your journey, such as exterior temperature, average and current fuel consumption, average speed and estimated distance to refuelling. It also includes a visual gear change recommendation for improved fuel consumption. Standard on all BlueMotion Technology models.
Powerful, athletic and built to perform.

Model shown is Golf Estate SE with optional 17" 'Porto' alloy wheels, parking sensors, heat insulating rear tinted glass and metallic paint.
Engines and gearboxes

The need to reduce carbon dioxide (CO₂) emissions and fuel consumption has grown stronger over the past decade, although the desire to have vehicles with increasingly better performance has remained as strong as ever. Volkswagen has strived to develop smaller engines that produce better fuel efficiency, while also maintaining the level of performance associated with larger engines. When an engine is downsized the power output is also reduced, which will affect the overall engine performance. However, when downsizing is combined with turbocharging and intelligent loading technology the performance issues can be overcome, with the 1.2 litre TSI 105 PS being a perfect example of this technology and power.

The TDI diesel engines with common rail technology are quiet, refined and fitted with a Diesel Particulate Filter (DPF) which filters out exhaust elements that are harmful to the environment, significantly reducing diesel emissions as a result.

The dual-clutch Direct Shift Gearbox (DSG) represents a milestone in the development of the latest gearbox technology. This innovative automatic gearbox from Volkswagen shifts smoothly and imperceptibly into the pre-selected next gear. Such extremely short reaction times and direct response behaviour make dynamic acceleration twice as much fun. Depending on the engine specification, the six or seven speed gearbox is not only highly dynamic, but also fuel efficient.

Select the DSG dual-clutch gearbox and you’ll enjoy gear changes faster than a manual, yet so smooth they’re virtually imperceptible, giving maximum driving enjoyment whatever the conditions. All Golf Estate models include a hill hold function – which automatically holds the vehicle for approximately two seconds when you come to a stop on a hill and then releases as you pull away. It’s details such as these that make the difference. Establishing the Golf Estate once more as a car that raises the bar.

The electro-mechanical power-assisted, speed-sensitive steering adapts with the help of variable servo support to suit your driving speed. Power-assisted steering provides greater comfort and is more responsive.
SAFETY

As you’d expect from a car offering such high levels of specification, the Golf Estate is extensively well equipped with a whole range of safety features, such as the innovative and comprehensive airbag system ensuring driver and passengers are well protected in any eventuality, or the optional Park Assist system to help make parallel parking easier for the driver.

In an emergency, the driver and passengers can rely on a comprehensive airbag system, which comprises driver and front passenger airbags with front passenger airbag deactivation switch, front seat side impact airbags and a curtain airbag system for front and rear passengers. Deployment of the airbags is activated by crash sensors. When an impact is registered, the airbag control unit ignites the gas generator, which then inflates the airbags within 30 to 40 milliseconds, significantly lowering the risk of injury, especially in the neck.

For greater safety, you can add the optional rear seat side airbag system which helps protect rear seat passengers even further. Optional on all models.

In addition to this, the Electronic Stabilisation Programme (ESP) recognises critical driving situations and reacts in milliseconds by targeting brake and engine management systems, controlling the speed of individual wheels and helping to bring the vehicle under control.

The front (ventilated) and rear disc brakes deliver excellent thermal performance, even if there’s a sharp rise in temperature of the brakes.

Whiplash-optimised front head restraints are height-adjustable, not only ensuring additional comfort, but also providing effective support for the head and spine in the event of a collision. Optional on all models.

The optional Park Assist system, with ultrasonic and audible front and rear parking sensors, steer the Golf Estate automatically into a parallel parking space only 1.1 metres longer than the vehicle. All you have to do is operate the accelerator, clutch and brake. Optional on all SE and Sportline models.

Front fog lights with static cornering function provide better illumination of the road ahead and when cornering, not only improving vision significantly, but also helping other road users to see you. Standard on all Sportline models and optional on all other models.

Interior shown features optional ‘Vienna’ leather upholstery.

The Golf Estate is fitted with an optional rear seat side airbag system, which helps protect rear seat passengers even further. Optional on all models.

The Electronic Stabilisation Programme (ESP) recognises critical driving situations and reacts in milliseconds by targeting brake and engine management systems, controlling the speed of individual wheels and helping to bring the vehicle under control.

The front (ventilated) and rear disc brakes deliver excellent thermal performance, even if there’s a sharp rise in temperature of the brakes.

Storage

The Golf Estate has room for just about everything. With a stowage capacity of up to 1,495 litres, it’s ready for anything your day may have in store for you, from walking the dog to going on holiday. It features numerous practical details, such as a removable luggage cover and handy storage compartments in the front and rear doors as well as in the roof console. The 60:40 split folding rear seat that folds flat into the boot floor enables you to stow large loads or carry a combination of passengers and luggage. As you can tell, flexibility is top priority in the Golf Estate.

As with any estate, flexibility and versatility are paramount, and here the Golf Estate excels, with a number of different features providing a wealth of practical solutions. Take, for example, the 60:40 split folding rear seats that fold flat into the boot floor which enables you to stow large loads or carry a combination of passengers and luggage, or the four load securing points in the luggage compartment to secure luggage or loads firmly in place. The luggage cover will hide items from prying eyes and with it removed and the rear seats folded down, there is a massive 1,495 litres of space, enough to accommodate large items with ease.

Keep your luggage safely in place with the retractable net partition. This option has a two position usage and can be used with the seats upright or when folded flat. Optional on all models.

Drawers beneath the front seats provide a handy storage solution for all those bits and pieces you need during your journey. Standard on all SE and Sportline models.
Optional equipment

The Golf Estate has been equipped with the highest level of specification yet, ensuring your total comfort and convenience. Ergonomic design combines with aesthetic detail to provide an interior offering total driving pleasure, where everything is clearly displayed and close to hand, and nothing is too much effort. However, as everyone has their own individual needs and requirements, a whole range of optional extras are also available, enabling you to create an interior providing even greater levels of practicality and luxury.

Optional equipment

- Rear-view camera: Provides a clear view to the rear of your vehicle, transmitting an undistorted live image to your radio display and enabling you to park easily and safely. This also helps when towing a trailer. Optional on all SE and Sportline models.
- Rear-view camera will be fitted in lieu of DAB digital radio receiver on RCD 510 DAB radio system. Must be ordered in conjunction with RCD 510 DAB radio system, RNS 315 navigation/DAB radio system or RNS 510 DVD navigation/DAB radio system.

- Multi Device Interface (MDI) with iPod and USB cables: Enables you to connect a compatible device, while track selection is viewed via the vehicle's radio system. The front centre armrest is included when this option is specified as SE5 model. Optional on all models.
- Phones must be Bluetooth HFP (Hands Free Profile) compatible, please contact your authorised Volkswagen retailer for specific phone compatibility.

- Front and rear parking sensors: Help with parking by emitting both audible and visual signals: the closer you are to an obstacle the faster the sound frequency. In addition, the Optical Parking Display shows your position on your audio system's display. Optional on all models.

- Front and rear parking sensors will be fitted in lieu of DAB digital radio receiver on RCD 510 DAB radio system. Must be ordered in conjunction with RCD 510 DAB radio system, RNS 315 navigation/DAB radio system or RNS 510 DVD navigation/DAB radio system.

- The RNS 315 touch-screen navigation/DAB radio system with MP3 compatible CD player features a 5-inch colour display with clearly arranged maps navigation, as well as an SD card reader. This ingenious system responds to your spoken voice commands which control the navigation, CD and radio functions. It is possible to give spoken navigation instructions such as the county, city, postcode, road names and house number. It also plays DVDs and music from the DVD drive, 30 GB hard drive or via an SD card. Optional on all SE and Sportline models.
- The RNS 315 touch-screen navigation/DAB radio system cannot be specified in conjunction with each other. Note, the DVD playback will not function whilst the navigation system is in use, or the vehicle is in motion.
- The RNS 510 touch-screen DVD navigation/DAB radio system with integrated voice control will guide you to your destination using preloaded navigation data from the 30 GB hard drive and includes a 6½ inch colour display. This system responds to spoken voice commands which control the navigation, CD and radio functions. It is possible to give spoken navigation instructions such as the county, city, postcode, road names and house number. It also plays DVDs and music from the DVD drive, 30 GB hard drive or via an SD card. Optional on all SE and Sportline models.
- The RNS 510 touch-screen DVD navigation/DAB radio system with integrated voice control will guide you to your destination using preloaded navigation data from the 30 GB hard drive and includes a 6½ inch colour display. This system responds to spoken voice commands which control the navigation, CD and radio functions. It is possible to give spoken navigation instructions such as the county, city, postcode, road names and house number. It also plays DVDs and music from the DVD drive, 30 GB hard drive or via an SD card. Optional on all SE and Sportline models.

- The leather trimmed multifunction steering wheel: ergonomically designed switches enable you to operate the radio, multifunction computer and Bluetooth telephone connections, without taking your hands off the wheel. Optional on all SE and Sportline models.
- The leather trimmed multifunction steering wheel: ergonomically designed switches enable you to operate the radio, multifunction computer and Bluetooth telephone connections, without taking your hands off the wheel. Optional on all SE and Sportline models.

- Front centre armrest: Provides additional comfort for the driver, while the rear seat passengers also benefit from two rear air vents and two cup holders. Optional on all SE and Sportline models.
- For information with that feature, please visit VW’s official website for specific phone compatibility.

- The Golf Estate optional equipment page dimensions: 1683.8x595.3
3Zone electronic climate control air conditioning features dual zone control for the driver and front passenger, allowing each to select their individually preferred temperature. A sensor monitors the exterior air quality, automatically activating the air recirculation function. Optional on all SE and Sportline models.

Interior shown features optional RCD 510 DAB touch-screen radio system. At 1.1 square metres, the optional panoramic sunroof provides an extra dimension of space and light. If it gets too hot or too cold, simply close the sunroof at the touch of a button using the control panel in the roof console above. As well as tinted glass, there’s also an electric sunblind that can be closed while the roof is still open, enabling you to enjoy the sunshine without fear of sunburn. Optional on S, SE and Sportline models.

Silver anodised roof rails are a handy and practical addition to the exterior of the Golf Estate, and add a real touch of style. Optional on all SE and Sportline models. Panoramic sunroof is not available on BlueMotion Technology models.

Chrome trimmed front fog lights with static cornering function provide better illumination of the road ahead and when cornering, improving vision significantly. Optional on all S and SE models and standard on all Sportline models.

Heat insulating rear tinted glass from the B pillar backwards is 65% light absorbing, helping reduce exposure to the sun’s rays whilst creating a sporting look. Optional on all SE models and standard on all Sportline models.

Exclusive ‘Vienna’ leather upholstery provides the ultimate in comfort and luxury, enhancing the Golf Estate’s interior ambiance. Available in Corn Silk Beige or Titan Black. Optional on all SE and Sportline models. Some parts of leather interior will contain artificial leather.

Headlight washers form part of the Winter pack, along with heated front seats, a low washer fluid warning light and automatically heated windscreen washer jets. Optional on all models.

Model shown features optional silver anodised roof rails.

Chrome trimmed front fog lights with static cornering function provide better illumination of the road ahead and when cornering, improve vision significantly. Optional on all S and SE models and standard on all Sportline models.

Luxury pack for all 5 models comprises electrically foldable door mirrors with reverse-activated kerb-view adjustment on passenger’s door mirror, dusk sensor, automatic coming/leaving home lighting function which ensures your surroundings are well lit for additional security. The dusk sensor activates the vehicle’s headlights when natural light levels diminish. Optional on all S and SE models. If it makes reversing just a little bit easier, it makes reversing just that little bit easier. Optional on all S and SE models.

Headlight washers form part of the Winter pack, along with heated front seats, a low washer fluid warning light and automatically heated windscreen washer jets. Optional on all models.

Model shown features optional silver anodised roof rails.
Wheels

The Golf Estate offers a selection of wheels, enabling you to choose the style that best suits your individual taste. Whether you prefer sporty and dynamic or classic and elegant, this gives you plenty of opportunity to add a touch of style and personality, and transform the appearance of your Golf Estate.

Elegant 16 inch steel wheels with 205/55 R16 tyres are light, hardwearing and visually very similar to an alloy wheel. Standard on S models. S BlueMotion Technology models are fitted with 205/55 R16 low rolling resistance tyres as standard.

Stylish 16 inch ‘Atlanta’ alloy wheels with 205/55 R16 tyres and anti-theft wheel bolts provide a distinctive look to the exterior. Standard on all SE and Sportline BlueMotion Technology models. SE BlueMotion Technology and Sportline BlueMotion Technology models are fitted with 205/55 R16 low rolling resistance tyres as standard.

Sporty 17 inch ‘Porto’ alloy wheels with 225/45 R17 tyres and anti-theft wheel bolts add a great look, while lowered sports suspension ensures safe and assured handling. Standard on Sportline and optional on SE models. Sportline BlueMotion Technology models feature 16 inch ‘Atlanta’ alloy wheels with 205/55 R16 low rolling resistance tyres as standard.

### Technical specification

† Seven speed auto DSG only available on this model.
**Technical specifcation notes**

- The minimum power output figures are quoted as 95% (or 45 kW). The weight of the fuel tank is approximate and therefore it may be possible to add a greater amount of fuel than the size of the tank specified, due to the space in the filler neck.
- The design of the fuel tank is approximate and therefore it may be possible to add a greater amount of fuel than the size of the tank specified, due to the space in the filler neck.
- The consumption calculation according to 1999/100/EC is based on the actual unladen weight of the vehicle. Additional specifications can lead to a higher weight class and hence to consumption figures of this higher weight class. The driving style, road and traffic conditions, environmental influences and vehicle condition on the day of measurement can in practice lead to consumption figures, which may differ from those calculated with this standard.
- To convert from metric to imperial horsepower, divide the HP figure by 1.3410.
- An increase in rear axle load, due to larger wheels and / or increased ride height, the device will only operate with a normal ride height.
- The minimum power output figures are quoted as 95% (or 45 kW). The weight of the fuel tank is approximate and therefore it may be possible to add a greater amount of fuel than the size of the tank specified, due to the space in the filler neck.

**Engines**

- 1.2 litre/105 PS (77 kW) petrol engine: EU5 emissions standard, four cylinder in-line direct injection engine, with four valves per cylinder. Fitted with a turbocharger module with electric boost pressure regulation. Available with a six speed manual or a six speed automatic DSG transmission.
- 1.6 litre/122 PS (90 kW) petrol engine: EU5 emissions standard, four cylinder in-line direct injection turbocharged engine, with four valves per cylinder. Fitted with a turbocharger. Available with a six speed manual or a six speed automatic DSG transmission.
- 1.6 litre/122 PS (90 kW) diesel engine: EU5 emissions standard, four cylinder in-line common rail diesel engine, with four valves per cylinder. Fitted with a turbocharger and a DPF (diesel particulate filter). Available with a five speed manual transmission.
- 1.4 litre/105 PS (01) (77 kW) petrol engine: EU5 emissions standard, four cylinder in-line direct injection engine, with four valves per cylinder. Fitted with a turbocharger and a DPF (diesel particulate filter). Available with a five speed manual transmission.
- 1.6 litre/122 PS (90 kW) diesel engine: EU5 emissions standard, four cylinder in-line common rail diesel engine, with four valves per cylinder. Fitted with a turbocharger and a DPF (diesel particulate filter). Available with a five speed manual transmission.
- 1.6 litre/122 PS (90 kW) diesel engine: EU5 emissions standard, four cylinder in-line common rail diesel engine, with four valves per cylinder. Fitted with a turbocharger and a DPF (diesel particulate filter). Available with a five speed manual transmission.

**Transmission**

- Front-wheel drive through a single-plate dry clutch. Hydraulic clutch mechanism.
- Six or seven speed manual gearbox. Six or seven speed automatic DSG gearbox with double plate half shafts (see charts on DSG models).
- Five speed manual: 1.4 litre TSI 105 PS, 1.4 litre TDI 105 PS
- Six speed manual: 1.2 litre TSI 110 PS, 1.4 litre TDI 110 PS, 2.0 litre TDI 160 PS
- Six speed automatic: DSG (270 litre 149 PS)
- Seven speed automatic: DSG (2.0 litre TSI 150 PS, 2.0 litre TDI 150 PS, 2.0 litre TDI 160 PS

**Rear suspension**

- Rear-wheel drive through the differential (final drive/Rear axle) to the differential (final drive/Rear axle).
- Front suspension through control arms with hydraulic shock absorbers, all elements integrated in the hub unit.
- Rear suspension through trailing arms with hydraulic shock absorbers, all elements integrated in the hub unit.

**Brakes**

- Front-wheel drive through full size front disc brake. Hydraulic brake mechanism.
- Electronic control of front brake system (ABS with Electronic Brake-force Distribution (EBD)).

**Steering**

- Hydraulic rack and pinion steering.
- Comfort: electronically assisted rack and pinion steering.
- Standard: electronically assisted rack and pinion steering.
- Brakes: electronically controlled hydraulic brake system (ABS with Electronic Brake-force Distribution (EBD)).
- Diagonal anti-lock brake system with brake and anti-lock mode (brakes hardened under accelerated.)
- Attractive front brake pads.
- All-wheel drive brake booster.
- Hydraulic Brake Assist (HBA)
The Golf Estate

A comprehensive range of accessories from alloy wheels to carpet mats is available to complement the vehi-
cle fully loaded and towed.

Unrestricted driving style with high speeds for maximum acceleration and heavy braking is not ad-
misible.

The service intervals for the Volkswagen service are:

- Oil change service Every 10,000 miles/1 year (whichever is soonest)
- Interior service Every 30,000 miles/3 years (whichever is soonest)
- Inspection service Every 60,000 miles/5 years (whichever is soonest)
- Tyre replacement service Every 10,000 miles (whichever is soonest)

You can opt for the Volkswagen approved accessories at your retailer. To see a complete range of approved
accessories, please contact your Volkswagen retailer or visit www.volkswagen.co.uk/ApprovedAccessories.

d Volkswagen are pleased to offer you a choice on how your Golf Estate is serviced. The appropriate selection
will be entirely dependent on how the car is likely to be driven and its general use. To help you identify which
type of service would most suit you, please refer to the following guide.

Service Intervals

Volkswagen cars are claimed to be a three-year/60,000 miles warranty, which protects your car against
the failure of most technical and electrical components due to manufacturing defects. This comprehensive
three-year/60,000 miles warranty (“Abbreviated Warranty”) includes the mileage issued (40,000 miles) as well as
the first three years, the manufacturer’s three-year warranty will still be valid. Full details of this three-year
warranty are available from your authorised Volkswagen retailer or repairer.

The Golf Estate comes as standard with a three-year/60,000 miles warranty, which protects your car against
the failure of most technical and electrical components due to manufacturing defects. This comprehensive
ten-year’s warranty up to a maximum of five years or 90,000 miles. Should the mileage exceed 60,000 miles
within the first two years, the manufacturer’s two-year warranty will still be valid. Full details of this two-year
warranty are available from your authorised Volkswagen retailer or repairer.

If you choose the Volkswagen Approved Accessories on your Golf Estate then you get the 100% Volkswagen Warrantv
and full details.
